

Biotinylated Human FGFR3 beta (IIIc) Protein

Cat. No. FGF-HM4BCB

Description

| | |
|-------------------------|---|
| Source | Recombinant Biotinylated Human FGFR3 beta (IIIc) Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. It contains Asp127-Gly377. |
| Accession | P22607 |
| Molecular Weight | The protein has a predicted MW of 30.1 kDa. Due to glycosylation, the protein migrates to 50-60 kDa based on Bis-Tris PAGE result. |
| Endotoxin | Less than 1EU per µg by the LAL method. |
| Purity | > 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC |

Formulation and Storage

| | |
|-----------------------|---|
| Formulation | Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization. |
| Reconstitution | Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water. |
| Storage | -20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles. |

Background

Four distinct genes encoding closely related FGF receptors, FGF R1-4, are known. All four genes for FGF Rs encode proteins with an N-terminal signal peptide, three immunoglobulin (Ig)-like domains, an acidbox region containing a run of acidic residues between the IgI and IgII domains, a transmembrane domain and the split tyrosine-kinase domain. FGFR3 is tyrosine-protein kinase that acts as cell-surface receptor for fibroblast growth factors and plays an essential role in the regulation of cell proliferation, differentiation and apoptosis. Plays an essential role in the regulation of chondrocyte differentiation, proliferation and apoptosis, and is required for normal skeleton development. Regulates both osteogenesis and postnatal bone mineralization by osteoblasts..

Assay Data

Bis-Tris PAGE

Biotinylated Human FGFR3 beta (IIIc) on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Biotinylated Human FGFR3 beta (IIIc) Protein

Cat. No. FGF-HM4BCB

Assay Data

The purity of Biotinylated Human FGFR3 beta (IIIc) is greater than 95% as determined by SEC-HPLC.

Biotinylated Human FGFR3 beta (IIIc) Protein

Cat. No. FGF-HM4BCB

Assay Data

ELISA Data

Biotinylated Human FGFR3 beta (IIIc), His Tag ELISA

0.05 μ g Biotinylated Human FGFR3 beta (IIIc), His Tag Per Well

Immobilized Biotinylated Human FGFR3 beta (IIIc), His Tag at 0.5 μ g/ml (100 μ l/well) on the streptavidin precoated plate (5 μ g/ml). Dose response curve for Anti-FGFR3 Antibody, hFc Tag with the EC50 of 4.1ng/ml determined by ELISA (QC Test).
